

Date: 15th of July 2007

Product Name: Site Administrator for SharePoint

Product Version: 1.7

Contact for more information: <http://www.quest.com>

Summary table

Criteria	Supporting features	Remarks and explanations
Section 1194.21: Software Applications and Operating Systems	Supported with minor exceptions. Please refer to the attached VPA	
Section 1194.22: Web-based internet information and applications	N/A	Site Administrator is not considered a Web-based product.
Section 1194.23: Telecommunications Products	N/A	Site Administrator is not a telecommunication product.
Section 1194.24: Video and Multi-media Products	N/A	Site Administrator doesn't use multimedia
Section 1194.25: Self-Contained, Closed Products	N/A	Site Administrator is a self-contained product
Section 1194.26: Desktop and Portable Computers	N/A	Site Administrator is software as defined under section 1194.21
Section 1194.31: Functional Performance Criteria	Supported with minor exceptions. Please refer to the attached VPA	
Section 1194.41: Information, Documentation and Support	Supported with minor exceptions. Please refer to the attached VPA	

Section 1194.21 Software applications and operating systems

Criteria	Supporting features	Remarks and explanations
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	<p>Supported with minor exceptions:</p> <p>Site Administrator supports Microsoft Windows accessibility features including StickyKeys, FilterKeys, Magnifier, Narrator, and High Contrast.</p> <p>Keyboard access is provided throughout Site Administrator and its help system. Keyboard shortcuts, shortcut keys, and menu commands are readily available.</p>	Minor exceptions in Site Administrator application involve limited keyboard access or inconsistent navigation in some menus and dialog windows. Most of these occurrences are often solved by minor workarounds.
(b.i) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards.	<p>Supported:</p> <p>Site Administrator in no case disrupts or disables any accessibility features of other products.</p>	
(b.ii) Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.	<p>Supported with minor exceptions:</p> <p>Site Administrator supports most accessibility settings of the operating system and in no case disrupts or disables any accessibility features of the operating system.</p>	Exceptions are features that do not support large font settings. These features are documented in 1194.21(g).
(c.i) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes.	<p>Supported:</p> <p>Site Administrator fully supports Windows Appearance Properties to provide visual on-screen focus and tracking throughout.</p>	
(c.ii) The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.	<p>Supported:</p> <p>Site Administrator is programmatically exposed because of usage only standard Windows API to control the focus.</p>	
(d.i) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology.	<p>Supported:</p> <p>Sufficient information about a user interface element including the identity, operation and state of the element is available because of usage only standard Windows API.</p>	
(d.ii) When an image represents a program element, the information conveyed by the image must also be available in text.	<p>Supported:</p> <p>Site Administrator does not use images to represent program elements.</p>	
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.	<p>Supported:</p> <p>Site Administrator utilizes standard and consistent images throughout. All toolbar and menu images also utilize tooltip text to further convey their meaning.</p>	

<p>(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.</p>	<p>Supported: Site Administrator uses standard system functions to send textual information to the operating system in all cases.</p>	
<p>(g) Applications shall not override user selected contrast and color selections and other individual display attributes.</p>	<p>Supported with minor exceptions: Site Administrator doesn't override user selected contrast and color selections. Site Administrator supports large fonts in the title bar and toolbars, and some dialogs.</p>	<p>Site Administrator does not support large font mode in dialogs where large fonts would render the dialog impossible to read</p>
<p>(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.</p>	<p>Supported: Site Administrator does not use animation to display critical information to the user.</p>	
<p>(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.</p>	<p>Supported: Site Administrator does not use color to convey information, indicating an action or prompting a response.</p>	
<p>(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.</p>	<p>Supported: Site Administrator doesn't allow adjusting color and contrasting settings. Those configured in the operating system are used.</p>	
<p>(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.</p>	<p>Supported: Site Administrator does not use flashing or blinking objects or text in any portion of the application interface</p>	
<p>(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.</p>	<p>Supported: Site Administrator does not use electronic forms</p>	

Section 1194.31 Functional performance criteria

Criteria	Supporting features	Remarks and explanations
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	<p>Supported with minor exceptions: Site Administrator supports technologies that make computer programs more accessible to people who use Assistive Technology.</p> <p>Site Administrator supports the use of screen readers to access user interface information</p>	<p>Commonly-used Assistive Technology may be used with Site Administrator. Users of AT should contact their AT vendor to assess the compatibility of their product.</p> <p>The operating system magnifier application is available to magnify text.</p>
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.	<p>Supported with minor exceptions: Site Administrator supports the use of screen readers to access user interface information.</p> <p>Site Administrator supports large fonts in the title bar, toolbars, and in some dialogs.</p>	<p>Site Administrator does not support large font mode in dialogs where large fonts would render the dialog impossible to read.</p> <p>The operating system magnifier application is available to magnify text. An assistive aid may also be used.</p>
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided	<p>Supported: Site Administrator does not require user hearing for access to any application functionality. Site Administrator does not use any form of audio cues.</p>	
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	<p>Supported: Site Administrator does not require user hearing for access to any application functionality</p>	
(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.	<p>Supported: Site Administrator does not require speech recognition.</p>	
(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.	<p>Supported: Site Administrator supports some operating system tools such as StickyKeys and FilterKeys as well as other Assistive Technologies.</p> <p>When the StickyKeys feature is on, the user can press a modifier key (SHIFT, CTRL, or ALT) and then another key in sequence rather than at the same time, to enter shifted (modified) characters and other key combinations. Pressing a modifier key once latches the key down until the user presses a non-modifier key or clicks a mouse button. Pressing a modifier key twice locks the key until the user presses the key a third time.</p>	

	<p>The FilterKeys accessibility feature allows the user to set the keyboard repeat rate, acceptance delay and bounce rate.</p>

Section 1194.41 Information, Documentation and Support

Criteria	Supporting features	Remarks and explanations
(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge	Supported: Site Administrator documentation is provided in PDF format. Additional documentation is completely accessible using the Help application supplied with Microsoft Windows	
(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	Supported with minor exceptions: Site Administrator documentation includes complete information on product navigation. However, it does not include system and user-defined shortcut keys.	
(c) Support services for products shall accommodate the communication needs of end-users with disabilities.	Supported: Quest Software's Support Services is familiar with such features as keyboard access and other options important to people with disabilities.	For technical assistance in the United States, you can contact Quest Software Support Services on a text telephone at (800) 306-9329 between 5:00 A.M. and 5:00 P.M. Pacific Time, Monday through Friday, excluding holidays.
